Frontend Developer

Saint-Petersburg, Russia

Education

Saint Petersburg State University of Economics

September 2012 — March 2015

Law faculty

Saint-Petersburg, Russia

About me

Have been working with web for many years now making reusable libraries, dealing with microfrontends in large-scaled webapps, leading projects and mentoring other developers. In the day-to-day work I aim to bring performance, scalability into the code, make it easier to understand, support and strive to deliver earlier.

Mentoring, leading, finding solutions together with engineers and non-engineers is a less coding side of being a developer that sparks more interest lately.
